Accessibility Compliance Made Simple: WCAG-Compliant PDFs, PPTs and Websites

Expert Document Remediation and Web Accessibility Services for Public Sector, Education and all service providers.

At Real Nation, we help organisations meet their digital accessibility obligations with professional PDF remediation, PowerPoint accessibility services, and WCAG-compliant website design.

If you're preparing for the EAA June 28th deadline, and need to make your educational content accessible to all, our experienced team will ensure your documents and digital assets meet international accessibility standards.

Accessible PDFs and PowerPoints: Designed for Everyone

From scanned documents to complex PDF presentations, we turn your existing files into fully accessible PDFs and PowerPoint presentations that meet WCAG 2.2 and PDF Universal Accessibility (UA) standards. Our PDF remediation services ensure screen reader compatibility, logical reading order, tagged content, alt text, and correct structure, making them usable by everyone, regardless of ability.

We also create accessible websites, PDF resources and PowerPoints from scratch, ideal for public communication, training materials, or e-learning platforms.
